## 1 General Information

MIP (Milestone Integration Platform) plugins and applications are dynamically loaded from the Milestone applications and services, which allows a simple installation and use.

The Smart Ruled Privacy Mask is part of the Smart Toolbox suite, which is running on the Event Server and the Management Client.

## 2 Installation

The installation of the all Toolbox Plug-ins are described in the Toolbox Installation Document which is valid for all the Plugins inside the Toolbox.

Please note, that the Smart Ruled Privacy Mask is running inside the Event Server and the Management Client. It needs the following (optional) two Step installation:

### → Server Side Installation

**→ If needed on a separate Management Client, you need to repeat the Server Side Installation on that PC.**

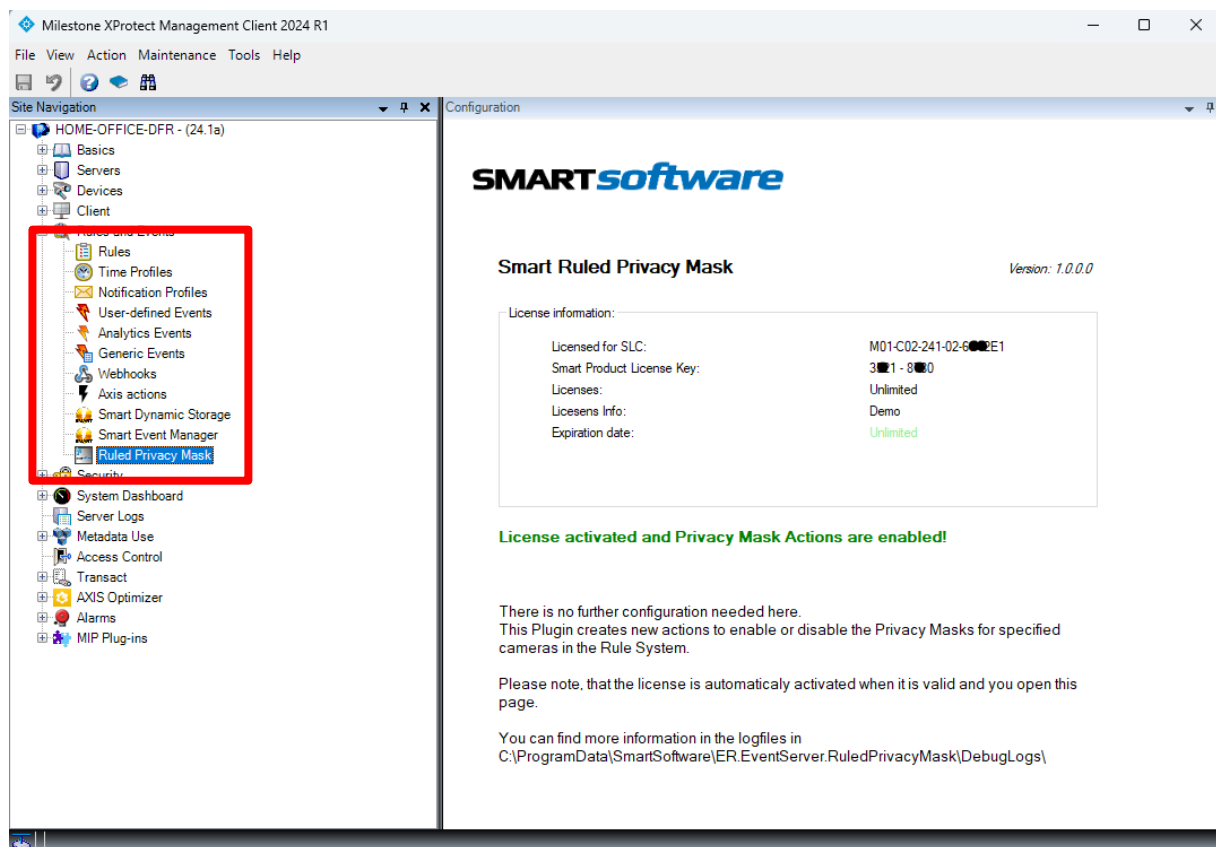

After the Client Side installation, the Smart Ruled Privacy Mask is ready for the configuration in the Management Client.

### 3 Using the Smart Ruled Privacy Mask

The Smart Ruled Privacy Mask Plugin extends the Rule System with Actions to Enable and Disable Privacy Masks for defined Cameras.

#### 3.1 Activating the License for the Smart Ruled Privacy Mask

After the Installation the Configuration Plugin (which is only used for the License activation) is available on the Management Client:

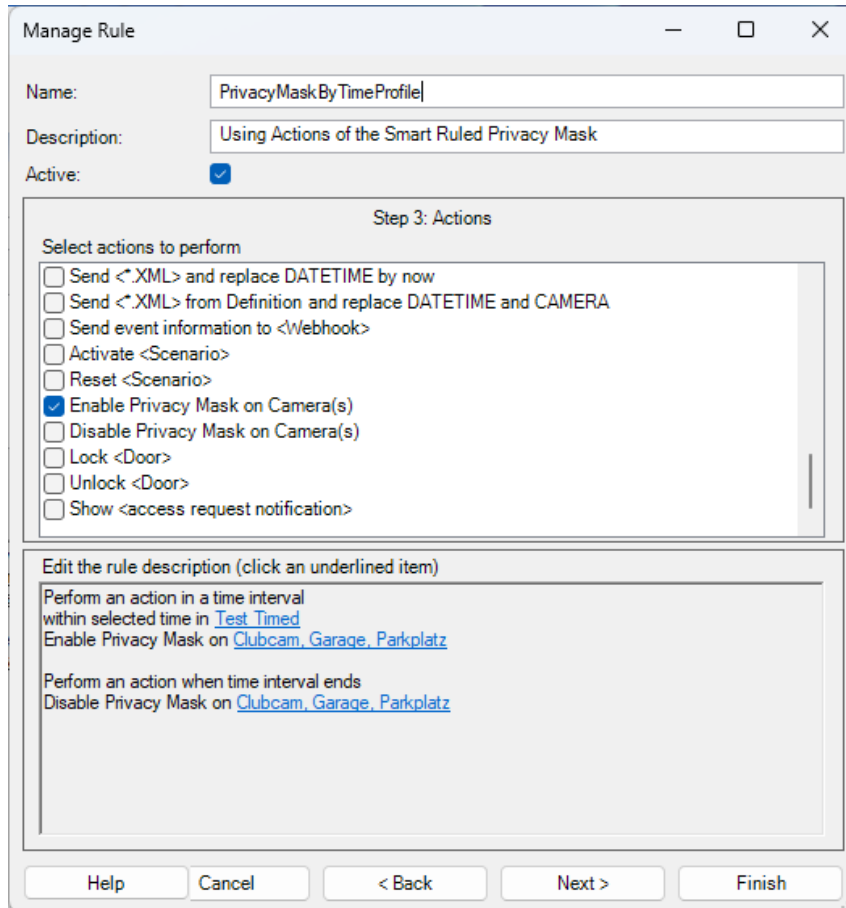

By opening this Page, the License is activated on the Event Server Plugin and the Actions are enabled when the License is valid.

#### Please note:

If the Smart Ruled Privacy Mask Entry is not available in the Management Client, please check if the Server Side Toolbox Plugin with the selected "Smart Ruled Privacy Mask" was executed on this PC and the Plugin is inside the root MIPPlugin folder of the Milestone installation path.

### 3.2 Configuration of the Smart Ruled Privacy Mask

The Smart Ruled Privacy Mask Plugin provides two new Actions to the rule System. The following rule shows a sample using a Time Profile:

Manage Rule

Name: PrivacyMaskByTimeProfile

Description: Using Actions of the Smart Ruled Privacy Mask

Active: ☒

Step 3: Actions

Select actions to perform

- ☐ Send <\*.XML> and replace DATETIME by now
- ☐ Send <\*.XML> from Definition and replace DATETIME and CAMERA
- ☐ Send event information to <Webhook>
- ☐ Activate <Scenario>
- ☐ Reset <Scenario>
- ☒ Enable Privacy Mask on Camera(s)
- ☐ Disable Privacy Mask on Camera(s)
- ☐ Lock <Door>
- ☐ Unlock <Door>
- ☐ Show <access request notification>

Edit the rule description (click an underlined item)

Perform an action in a time interval within selected time in Test Timed  
Enable Privacy Mask on Clubcam, Garage, Parkplatz

Perform an action when time interval ends  
Disable Privacy Mask on Clubcam, Garage, Parkplatz

Help Cancel < Back Next > Finish

**Please note:**

Have a look into the Log files located at

C:\ProgramData\SmartSoftware\ER.EventServer.RuledPrivacyMask\DebugLogs\

The logs will show all communications and might be useful in case of an issue.
