3.1	Configuration of the SPEAKER AUDIO MIXER	3
3.2	Use the SPEAKER AUDIO MIXER	4

1 General Information

MIP (Milestone Integration Platform) plugins and applications are dynamically loaded from the Milestone applications and services, which allows a simple installation and use.

The Smart SPEAKER AUDIO MIXER overlay plugin is part of the Smart Toolbox suite, which is running on the Smart Client.

2 Installation

The installation of the all Toolbox Plug-ins are described in the Toolbox Installation Document which is valid for all the Plugins inside the Toolbox.

Please note, that the Smart SPEAKER AUDIO MIXER is running on the Smart Client and needs the two Step installation:

→ Server Side Installation

→ Download from Download Manager and Client Side Installation

After the Client Side installation, the Smart SPEAKER AUDIO MIXER is ready for use in the Smart Client.

3 Using the Smart SPEAKER AUDIO MIXER

The Smart SPEAKER AUDIO MIXER allows you to speak to multiple Speakers at the same time by selecting individual Speakers or Speaker Groups.

3.1 Configuration of the SPEAKER AUDIO MIXER

Use the “Speaker mixer” button in the upper right corner to open the Speaker selection window and press on the “Select Speakers” button to enter the Speaker selection settings. Check all Speakers or Speaker Groups you want to talk with. You can Filter the TreeView by Server or Group Hierarchy. When hovering over the selection Button, the selection is shown in the Tooltip.

3.2 Use the *SPEAKER AUDIO MIXER*

Once you have selected the Speakers, you can talk to them with your connected Microphone. The “Speaker mixer” Button toggles the visibility of the Speaker window.

Use the “Microphone” Button “Push to talk” to all selected Speakers.
